Dear Sirs

Please see attached the end user undertaking form (EUU) for you to complete. This is a document from the end user which details who they are, where they are based and for what purpose they are using the goods. The EUU should be completed and signed by a person in authority (ie a director) within the end user business. The purpose of an EUU or Consignee undertaking is to guard against exports being diverted to undesirable end users.

The EUU contains a declaration by the end user that they will not re-export or transfer the goods to a destination subject to an embargo imposed by the UN, EU or OSCE (Organisation for Security and Cooperation in Europe) where to do so would be a breach of that embargo.

A covering letter must also be completed on the end users letter headed paper and duly signed by the same signatory who completed and signed the end user undertaking form.

We also attach the End User Undertaking Checklist to assist you in completing the EUU form.

Once the EUU form and covering letter has been completed we will require you to post to us the originals. In accordance with regulations the exporter must obtain the original end user undertaking and hold it in their records.

Information regarding Standard Individual Export Licences (SIEL) and end user undertakings can be found on: <http://www.businesslink.gov.uk/exportcontrol>

With Regards  
LJACKSON & CO

## NOTES

An End-User Undertaking Form is required when applying for a Standard Individual Export Licences (SIEL) issued by the UK's Export Control Organisation (ECO), part of the Department for Business, Innovation and Skills (BIS).

The EUU is required supporting documentation for End-Use Control purposes in making an export licence application to the Export Control Organisation (ECO).

If you are able to use this form, you are advised to do so. (If you choose not to, ECO require an original signed / dated undertaking from the end-user on headed paper that contains the same information and assurances).

### Important:

It is the **UK exporter's responsibility** to ensure that:

- All sections of the form are completed legibly and in English (or accompanied by an authorised translation if written in a foreign language) by either the end-user or consignee (as appropriate) on their original headed paper.
- Each page of the form needs to be signed and dated by an official of the end-user or consignee as applicable to the export in question
- The same end-user or consignee (as applicable) should also complete, sign and attach a covering letter on their original headed paper. See [Annex A to EUU Form](#)
- Copies of the EUU form and covering letter should be attached to the completed export licence application on ECO's SPIRE database – <https://www.spire.bis.gov.uk>
- The original EUU/covering letter is obtained and retained on record by the exporter.

### Explanation of Terminology

<sup>1</sup> The exporter should be the person or firm who makes the licence application.

<sup>2</sup> The exporter's reference can be completed by the exporter.

<sup>3</sup> The consignee is normally the person or body to whom the goods are to be first sent. If the consignee is not the same as the end-user, then all of the boxes should be completed.

<sup>4</sup> The end-user details should be those of the person or body who will receive the goods for end-use.

<sup>5</sup> Export Control Organisation need to understand what the goods are and to be able to compare them with the goods described on the licence application. We need a detailed description of the main item or items. If, for example, the main item or items are accompanied by a long list of spares or accessories, you should indicate this, but it may not need to spell out the items individually. If the goods are spares, components or accessories, you should indicate what they are to be used for, and describe clearly the item in or with which they will be used (e.g. turbine blades for XX engine for YY aircraft).

<sup>6</sup> If the goods are to be incorporated into another product, then that product – and its use and ultimate end user – should also be described where known. Section 3 can be used for this purpose.

<sup>7</sup> To be signed and dated by the body or person, in the country of ultimate destination, who will make final use of the goods.

<sup>8</sup> An up-to-date list of applicable destinations subject to arms embargoes can be found at on the

<sup>9</sup> [export control pages of the Businesslink website](#) listed under the link to "Current Export Restrictions"

If Section 4 cannot be completed, this section must be completed by the person to whom the goods are to be sent.

-----  
<sup>i</sup> includes research on or development, design, manufacture, construction, testing or maintenance of any nuclear explosive device or components of subsystems of such a device.

<sup>ii</sup> includes research on or development, design, manufacture, construction, operation or maintenance of any reactor, critical facility, conversion plant, fabrication plant, reprocessing plant, plant for the separation of isotopes of source or special fissionable material, or separate storage installation, where there is no obligation to accept IAEA safeguards at the relevant facility or installation, existing or future, when it contains any source or special fissionable material; or of any heavy water production plant where there is no obligation to accept IAEA safeguards on any nuclear material produced by or used in connection with any heavy water produced therefrom; or where any such obligation is not met.
